Is this a Revised Enquiry \* :  YES  NO

Select Services Required

Mold  Testing Lab / Consultancy  Compounding  Molding / Processing / Direct Product

- Fill up the details required for the application service conditions.
- Upload Product drawing (without your company name or Logo)
- Upload the material specification or can use our tool develop a specification which has to be downloaded & then uploaded back to the portal.
- The form is submitted & get the message of successfully submitted.
- The form is edited (if required) & approved by the administrator such that the approved vendors could view & quote accordingly.
- The customer can track their project once approved & selects the suitable vendors for the project depending upon their quote & available infrastructure.
- After the selection of the vendor and receipt of the initiation token amount the project is initiated by the administrator.
- The report will be submitted by the selected vendors to update the status of their activities.

- If there's any issue the customer can generate a revised code & the cycle is repeated till the target is achieved.

## MOLD MANUFACTURERS

- The Mold Manufacturers registers himself & gets MO as prefix to his USERID.
- He /She can upload the images of their infrastructure to keep their profile strong & get attracted by the customers.
  - Note : - Kindly be professional as not to upload the contact information in the image form.
- The Mold Manufacturers can view the client's requirement through this portal & give their response and quote for the same.
- He /she can provide the target date upon receipt of the advance payment which is 50 % of the quoted price.
- The committed delivery time and quality inspection report can be updated in the their project profile for customers review.

## RUBBER EXPERTS CONSULTANTS & TEST LABS

- The Test Labs / Consultants registers themselves & gets TL as a prefix to their User ID.
- They can upload their equipments & infrastructures.
- They can view the client's specification & quotes to deliver the test report & get it updated in the portal.

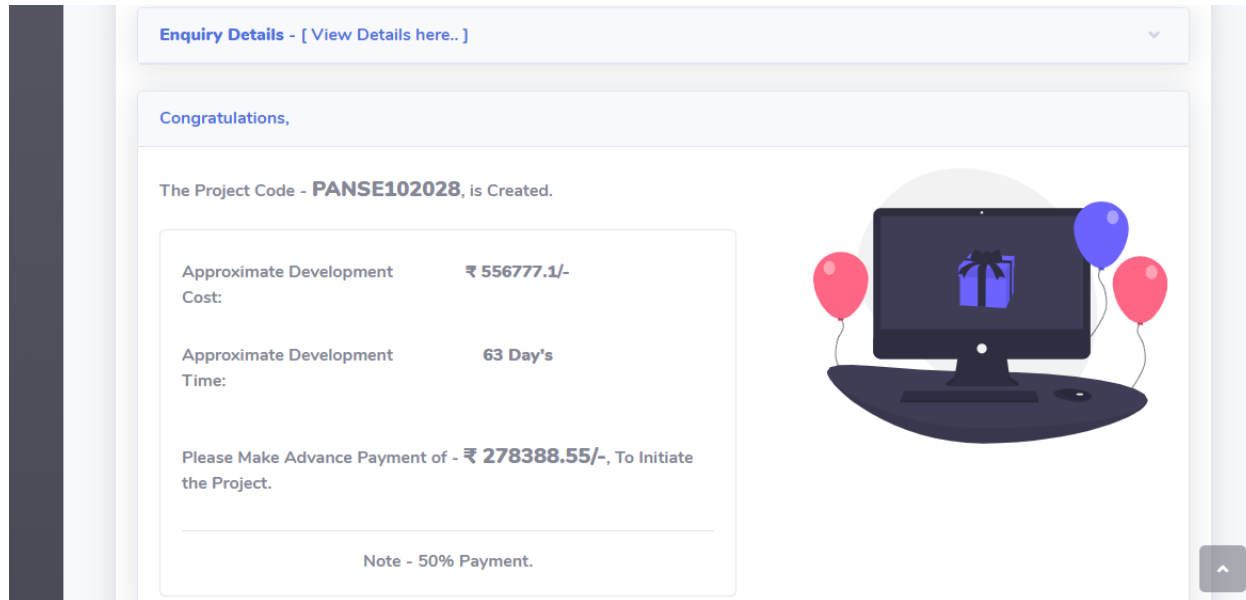

## Rubber Compounder

- Similarly, the compounder can view the specification required for that particular project & quotes his material cost.
- His material is tested by the Test Lab or the test lab generates formulation to the compounder as per the requirement.

## Rubber Processor

- The Rubber Processor is categorized depending upon the availability of the infrastructure such as the Sizes of the Molding Press, the product quantity, Preform Extrusion, Whether the product is in extruded form or a calendared sheet or a roto-cured.
- They can view the product details & can quote as per the availability of infrastructure.

Once all the quotes are submitted & vendors are selected the client can view the entire project cost & have to deposit the token advance amount to start the project which will be distributed to the vendors too.
